

CS102 PAIRED TECHNICAL INTERVIEW

Monica Gnajewski

Giankyle Vallarta

Interviewer Form

Problem: **Evaluate Reverse Polish Notation**

1) Problem Understanding: 3/4

- Understood the problem well, but had questions about the input format
- Needed hint on what data structure to use, but was able to determine he needed to use a stack
- Slight confusion on which element to pop first

2) Communication & Collaboration: 3/4

- Communicated about his thought process constantly, making it easy to address minor errors
- Receptive to hints and feedback

3) Implementation & Technical Depth: 3/4

- Solution was mostly correct, aside from minor errors
- Forgot the final else statement that pushes integers onto the stack

4) Team Fit & Working Style: 4/4

- I would want this person on my team
- Although there were errors, he was very receptive to feedback and remained calm
- He asked many clarifying questions about syntax

Final Evaluation:

- Lean Hire
- 13/16

Final Decision

- I would consider hiring this person. They seem to have a good understanding of how to solve problems and are receptive to feedback. He may need to brush up on Python syntax and data structures a bit more.

Candidate Form

```
def mergeTwoLists(list1: Optional[ListNode], list2: Optional[ListNode]) -> Optional[ListNode]:  
    newList = ListNode()  
    currNode = newList
```

```
while list1 and list2 != NULL:
    if list1.val > list2.val:
        newList.next = list2
        list2 = list2.next
    else:
        newList.next = list1
        list1 = list1.next
        currNode = currNode.next

    if list1:
        currNode = list1.next
    else:
        currNode = list2.next

return newList
```
